Belonging in Central Oregon

Resilience in Central Oregon

Moving forward together

Introduction

Purpose of today's session

Over the past year, a team from OHSU and OSU-Cascades has been leading a community-engaged research study on belonging and resilience in Central Oregon. Today we will share some of the results with you and invite you to tell us what you think during a few group activities. Your shared point of view will help study findings be used more meaningfully in our community.

Guidelines for discussion

- Assume good intentions.
- Build on the ideas of others.
- It's okay to disagree, do so with respect.
- Ask clarifying questions but stay focused on the topic.
- Listen to each other.
- Create a safe and supportive environment.
- Be respectful of different cultural backgrounds.

What group agreements do you want to add?

If you have further questions or additions that we don't have time for today, let's exchange contact info so we can follow-up!

Email Kaitlin at: greenkai@ohsu.edu

What is something that you do to help others feel they belong?

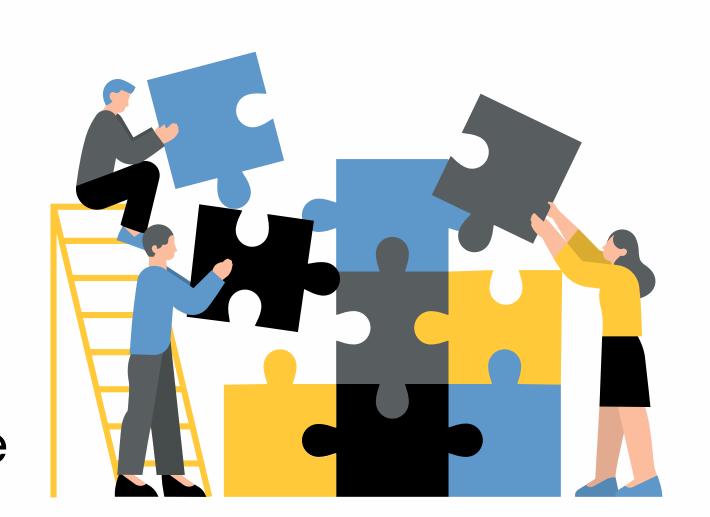

Belonging is the feeling of acceptance and value that comes through sharing experiences or characteristics with others. Some experiences or characteristics are more important than others in making us feel like we belong to a community.

Community can be defined however is meaningful to you – it can describe places, spaces, or groups of people with whom you share common characteristics or interests.

Approach & Objectives

The purpose of the community belonging research project is to:

- Measure community belonging and resilience in Central Oregon
- Team up with community members to make meaning from and share the findings to help build programs that foster community connections and improve community health

Research Scope

A brief overview of the Community Belonging Research Study

A postcard invitation to participate in the survey was sent to 13,000 addresses in Central Oregon.

22 community organizations shared the survey with their networks via email, social media, and physical and electronic flyers.

We attended 9 in-person events, including at mobile food pantries and soup kitchens in the tri-county area.

vvnen	was data	collected?

January 2023 to July 2023

How many people participated?

1,019 Survey participants35 focus group participants

Where did the study take place?

 Deschutes, Crook, Jefferson, and Northern Klamath County, as well as the Confederated Tribes of Warm Springs Reservation

How was data collected? Qualitative Methods

 90 minute virtual focus groups with 7 priority communities, covering topics of belonging in places and spaces, and identity

How was data collected? Quantitative Methods

 A survey on belonging, resilience, and health for Central Oregon residents

What are the limitations of the study?

 Only conducted in English and Spanish

 Snapshot in time, can't measure change over time

About the Sample*

We conducted virtual and paper surveys with 1,019 Central Oregonians. Here's a little bit more about them.....

Gender

- 29% men
- 69% women
- 2% non-binary**

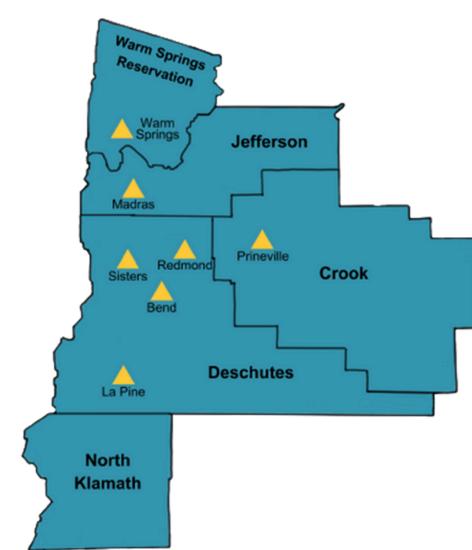

Age

- 27% 18-34
- 51% 35-64
- 23% 65+

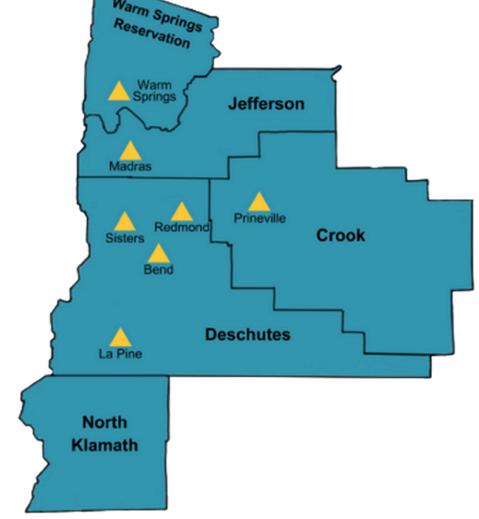

Town

- 48% in Bend
- 13% in La Pine
- 8% in Madras
- 8% in Prineville
- 17% in Redmond
- 4% in Sisters
- 3% in Warm Springs

Race & Ethnicity***

- 77% White only
- 10% Hispanic or Latine/o/a
- 7% Native American
- 3% Asian
- <1% Black
- 1% Native Hawaiian or Pacific Islander
- 8% Biracial

Sexual Orientation

- 87% Straight or Heterosexual
- 9% Lesbian, Gay, Bisexual, Pansexual or Queer
- <5 Asexual participants

Education

- 12% High school/GED or less
- 19% Some college
- 15% 2 year degree
- 54% Bachelor's degree or greater

Income

- 13% Less than \$25,000
- 19% \$25,000-\$49,999
- 19% \$50,000-\$74,999
- 17% \$75,000-\$99,999
- 31% 100,000 or more

^{*}Totals may not add up to 100% due to rounding and/or non-response

^{**} Response options included: non-binary, third gender, agender, gender nonconforming or genderqueer

^{***}Respondents were able to select more than one option

About the Parents & Caregivers Sample*

Of the 1,019 people who completed the survey, **241 were parents or caregivers of children** under **18 years of age** . Here's a little bit about them....

Gender

- 18% men
- 81% women
- <5 non-binary respondents**

- 44% in Bend
- 13% in La Pine
- 11% in Madras
- 11% in Prineville
- 16% in Redmond
- 3% in Sisters
- 3% in Warm Springs

Race & Ethnicity***

- 73% White only
- 16% Hispanic or Latine/o/a
- 5% Native American
- 3% Asian
- <5 Black respondents
- <5 Native Hawaiian or Pacific Islander respondents

Education

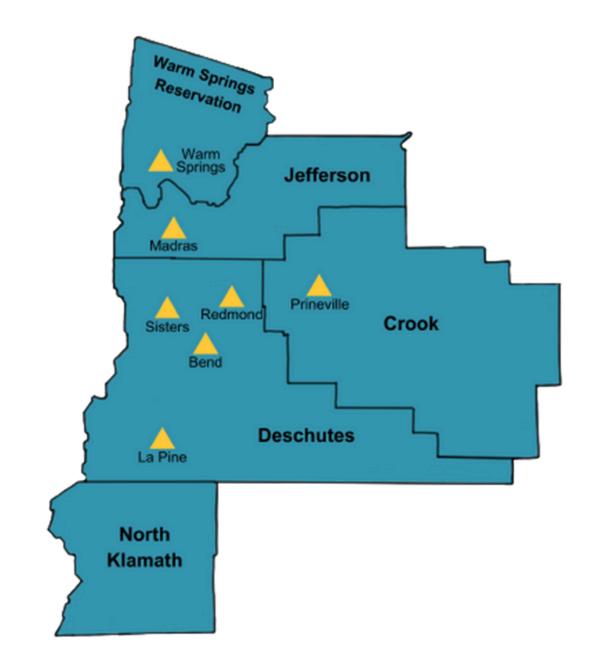

- 13% High school/GED or less
- 17% Some college
- 16% 2 year degree
- 53% Bachelor's degree or greater

Age

- 26% 18-34
- 73% 35-64
- 4% 65+

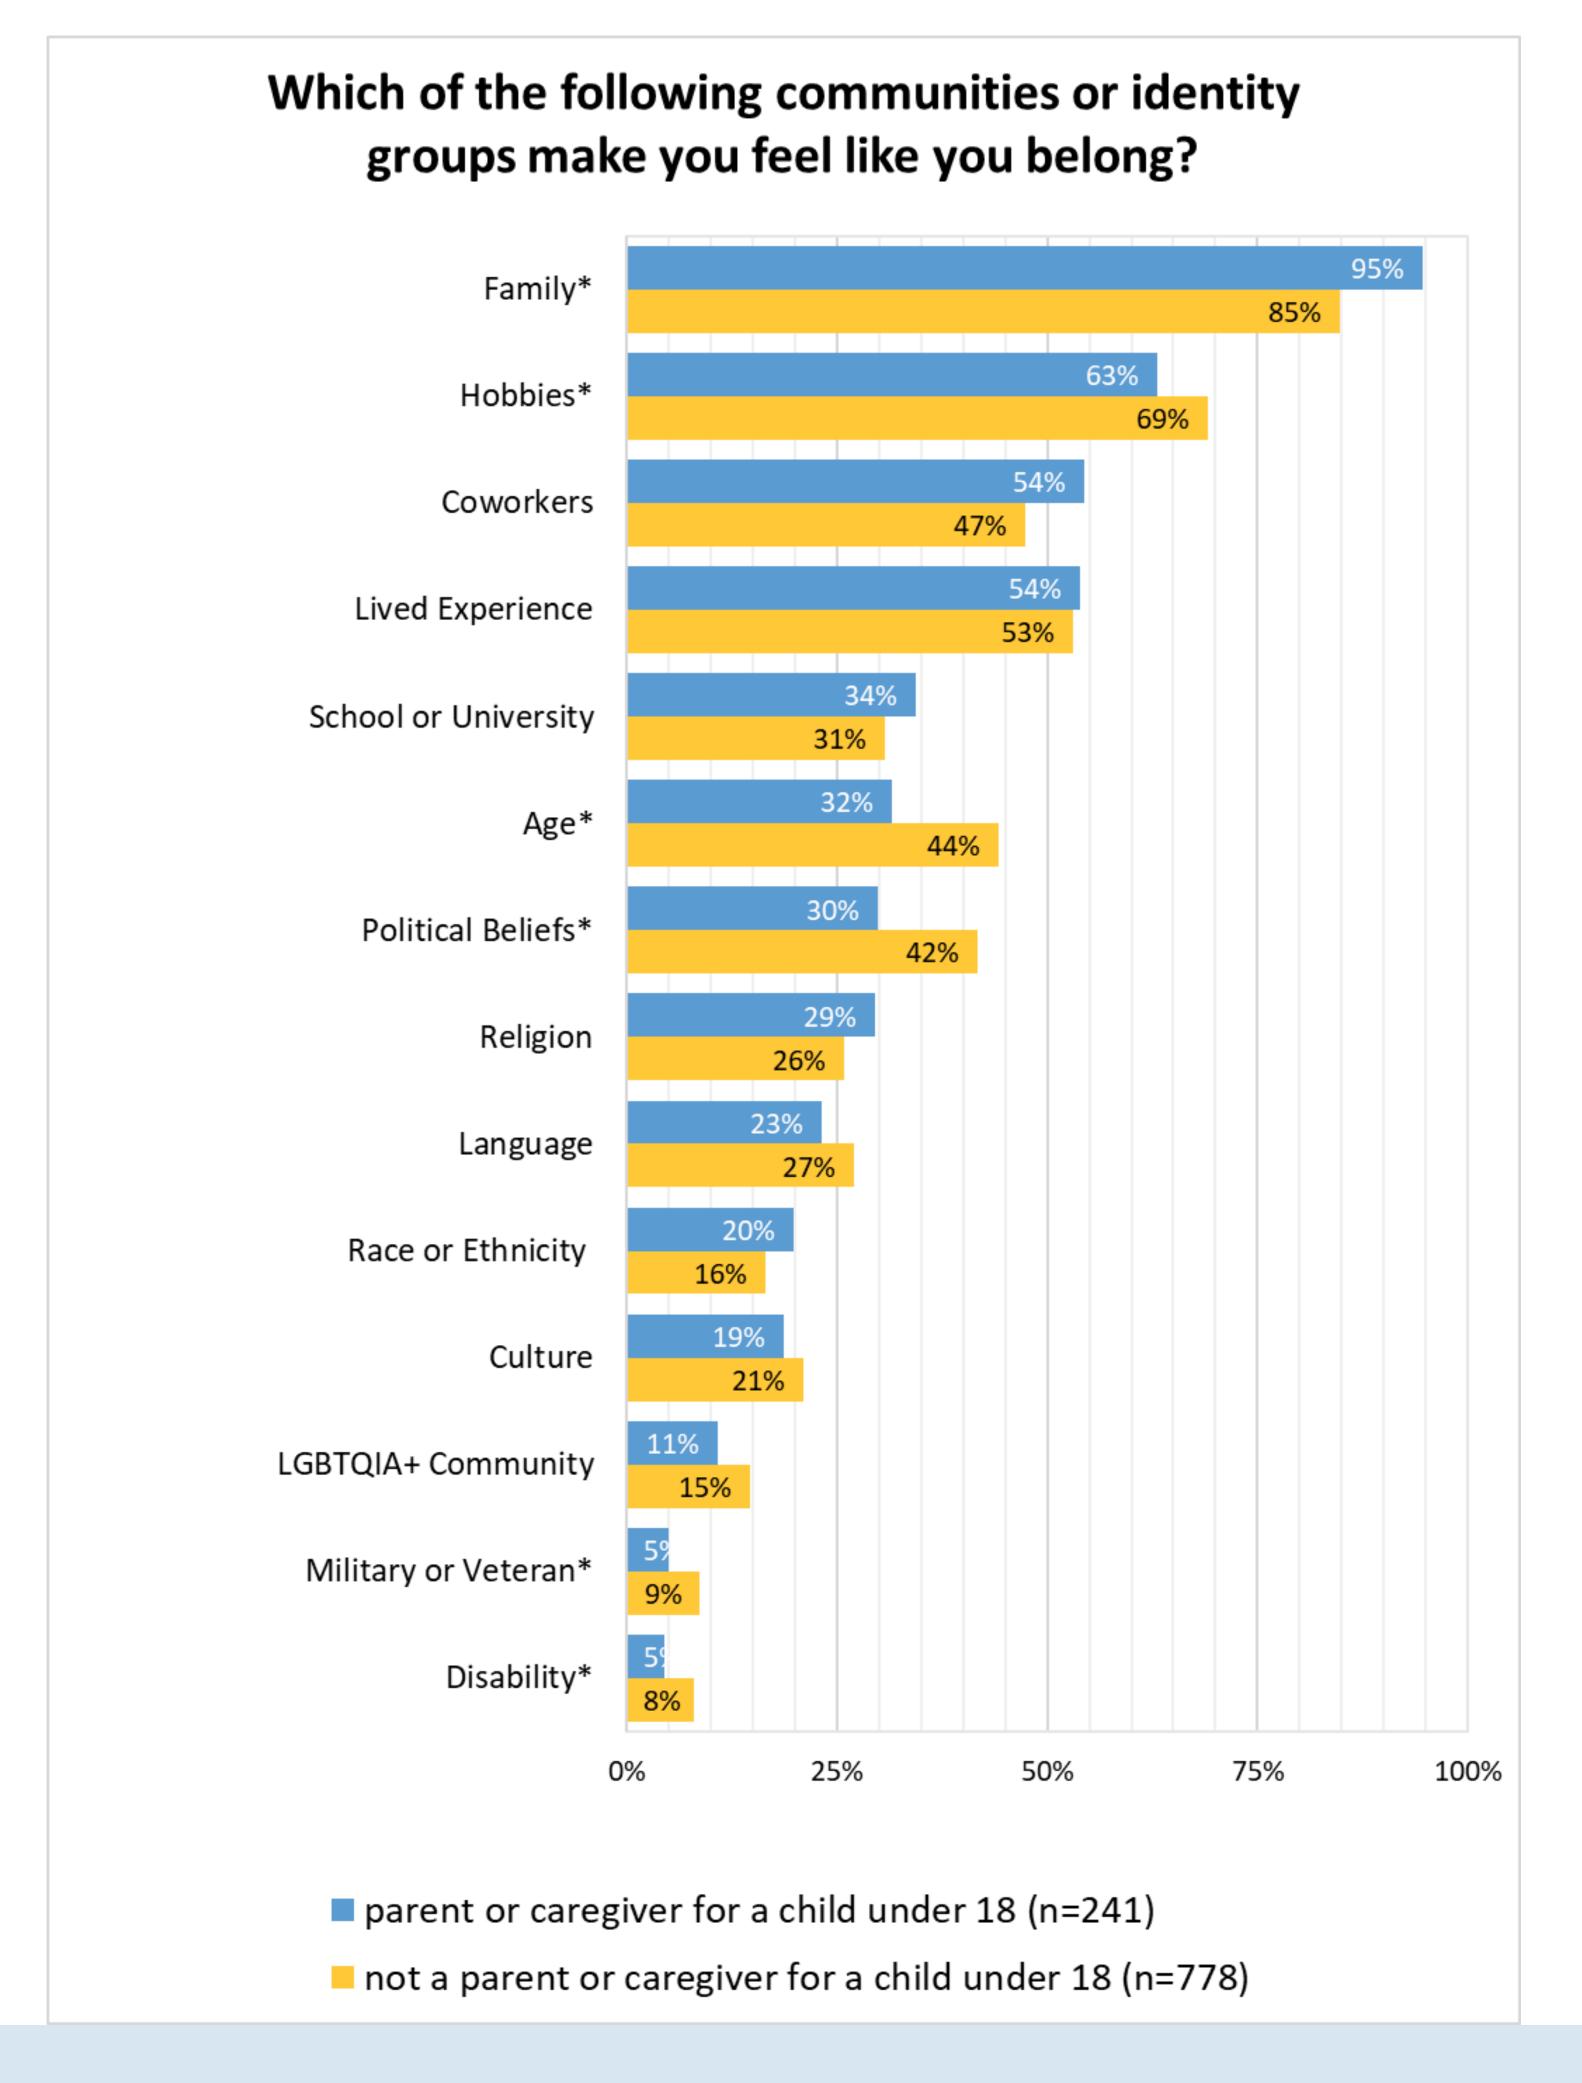

Income

- 9% Less than \$25,000
- 19% \$25,000-\$49,999
- 22% \$50,000-\$74,999
- 18% \$75,000-\$99,999
- 32% 100,000 or more

^{*}Totals may not add up to 100% due to rounding and/or non-response

^{**} Response options included: non-binary, third gender, agender, gender nonconforming or genderqueer

^{***}Respondents were able to select more than one option

*There is a statistically significant difference between parents/caregivers and those who are not for items with an asterisk.

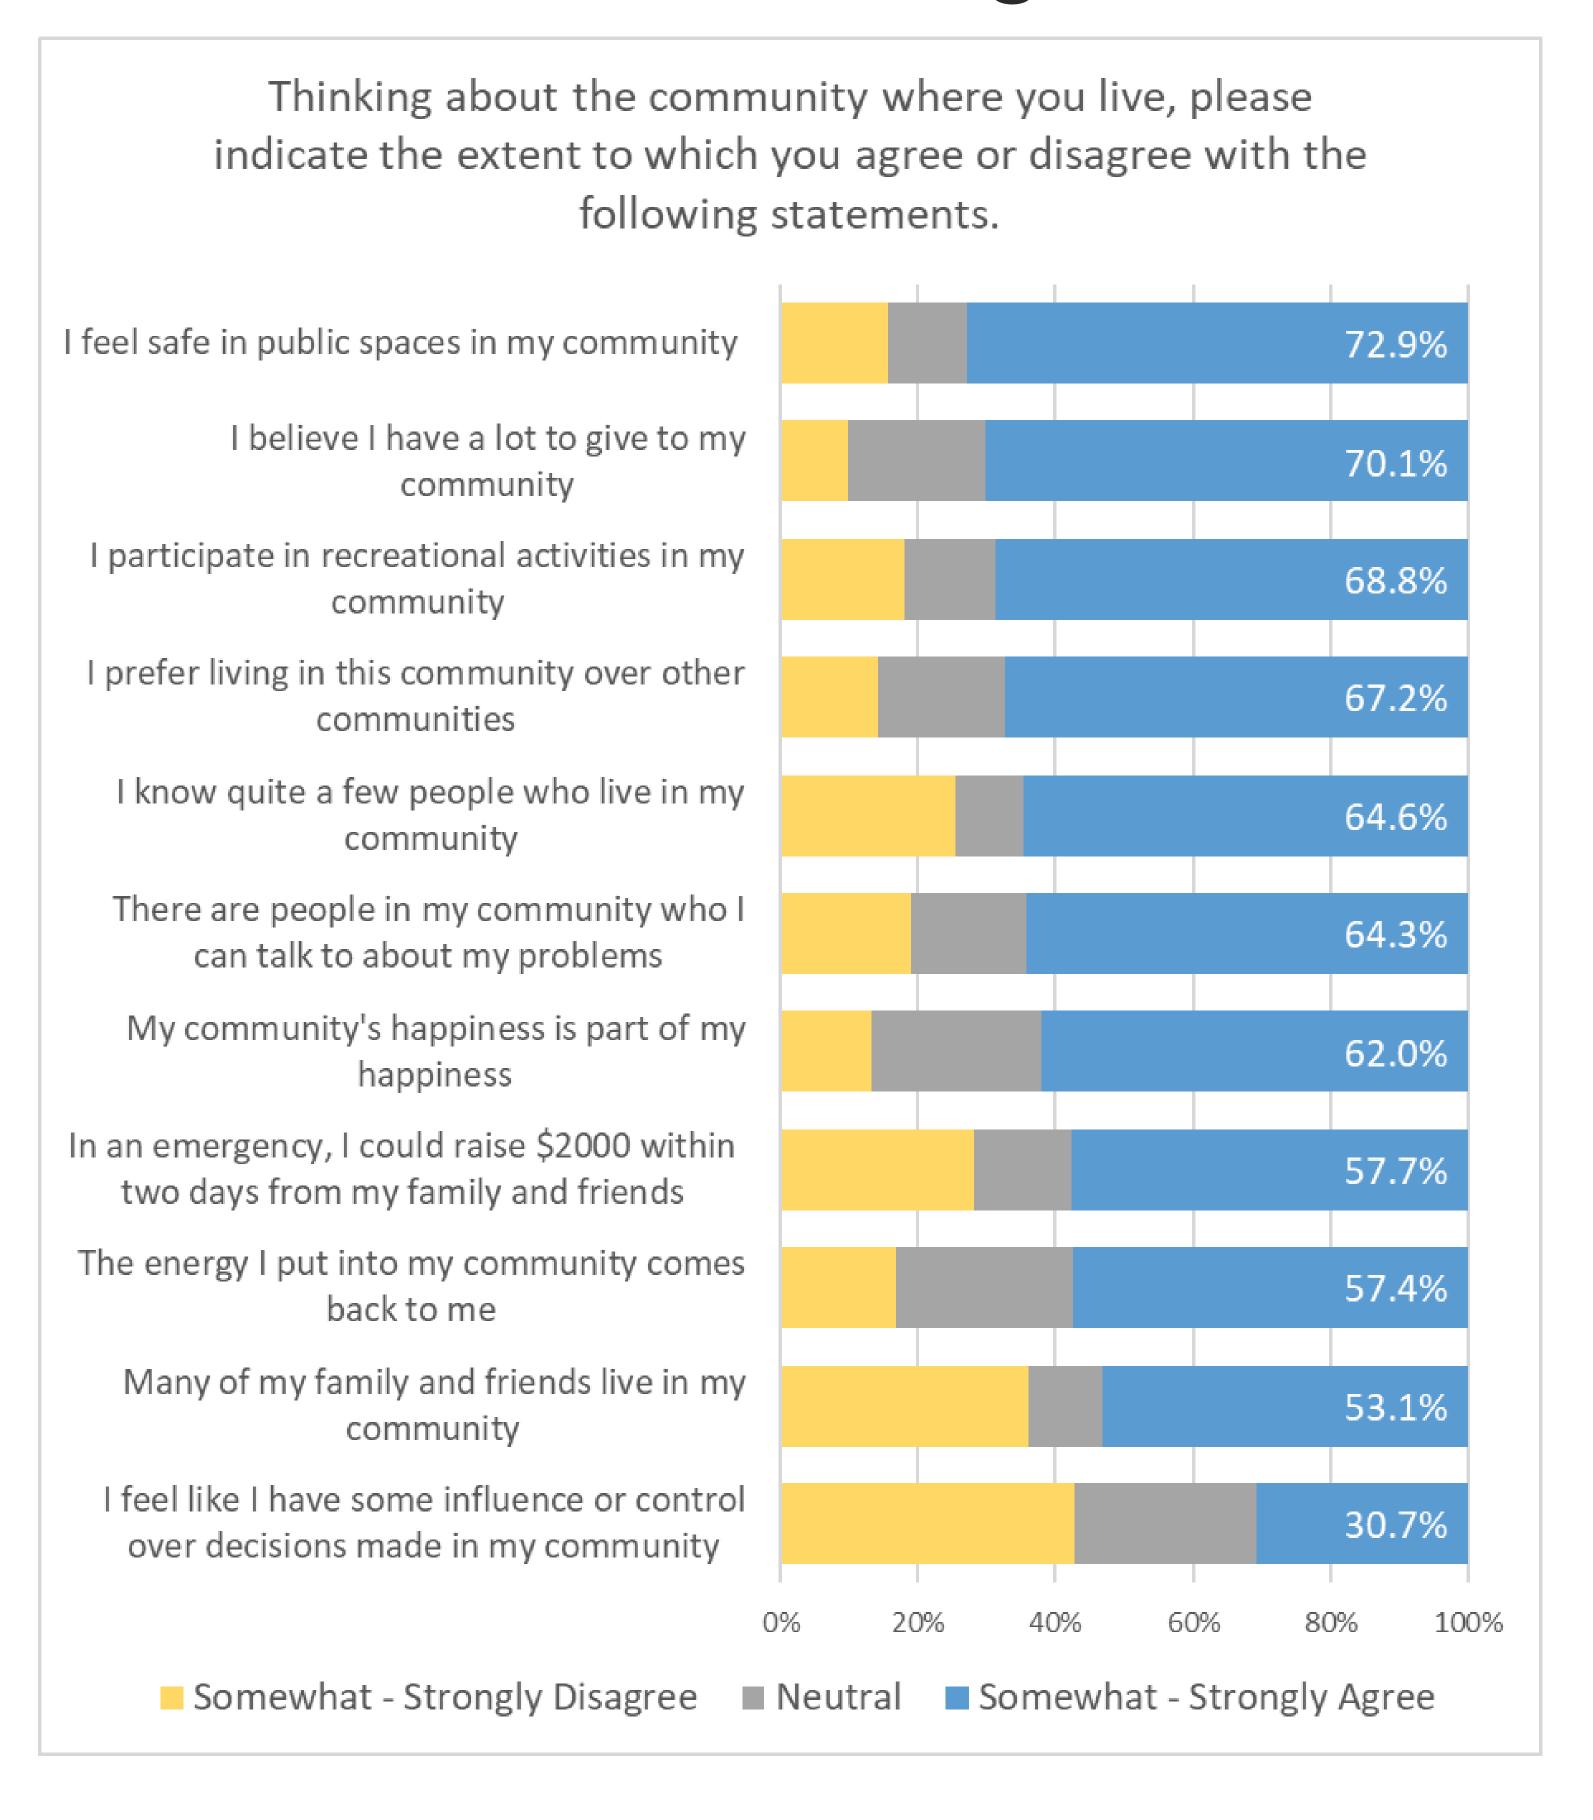

What comes up for you? How is your experience similar? How is your experience different?

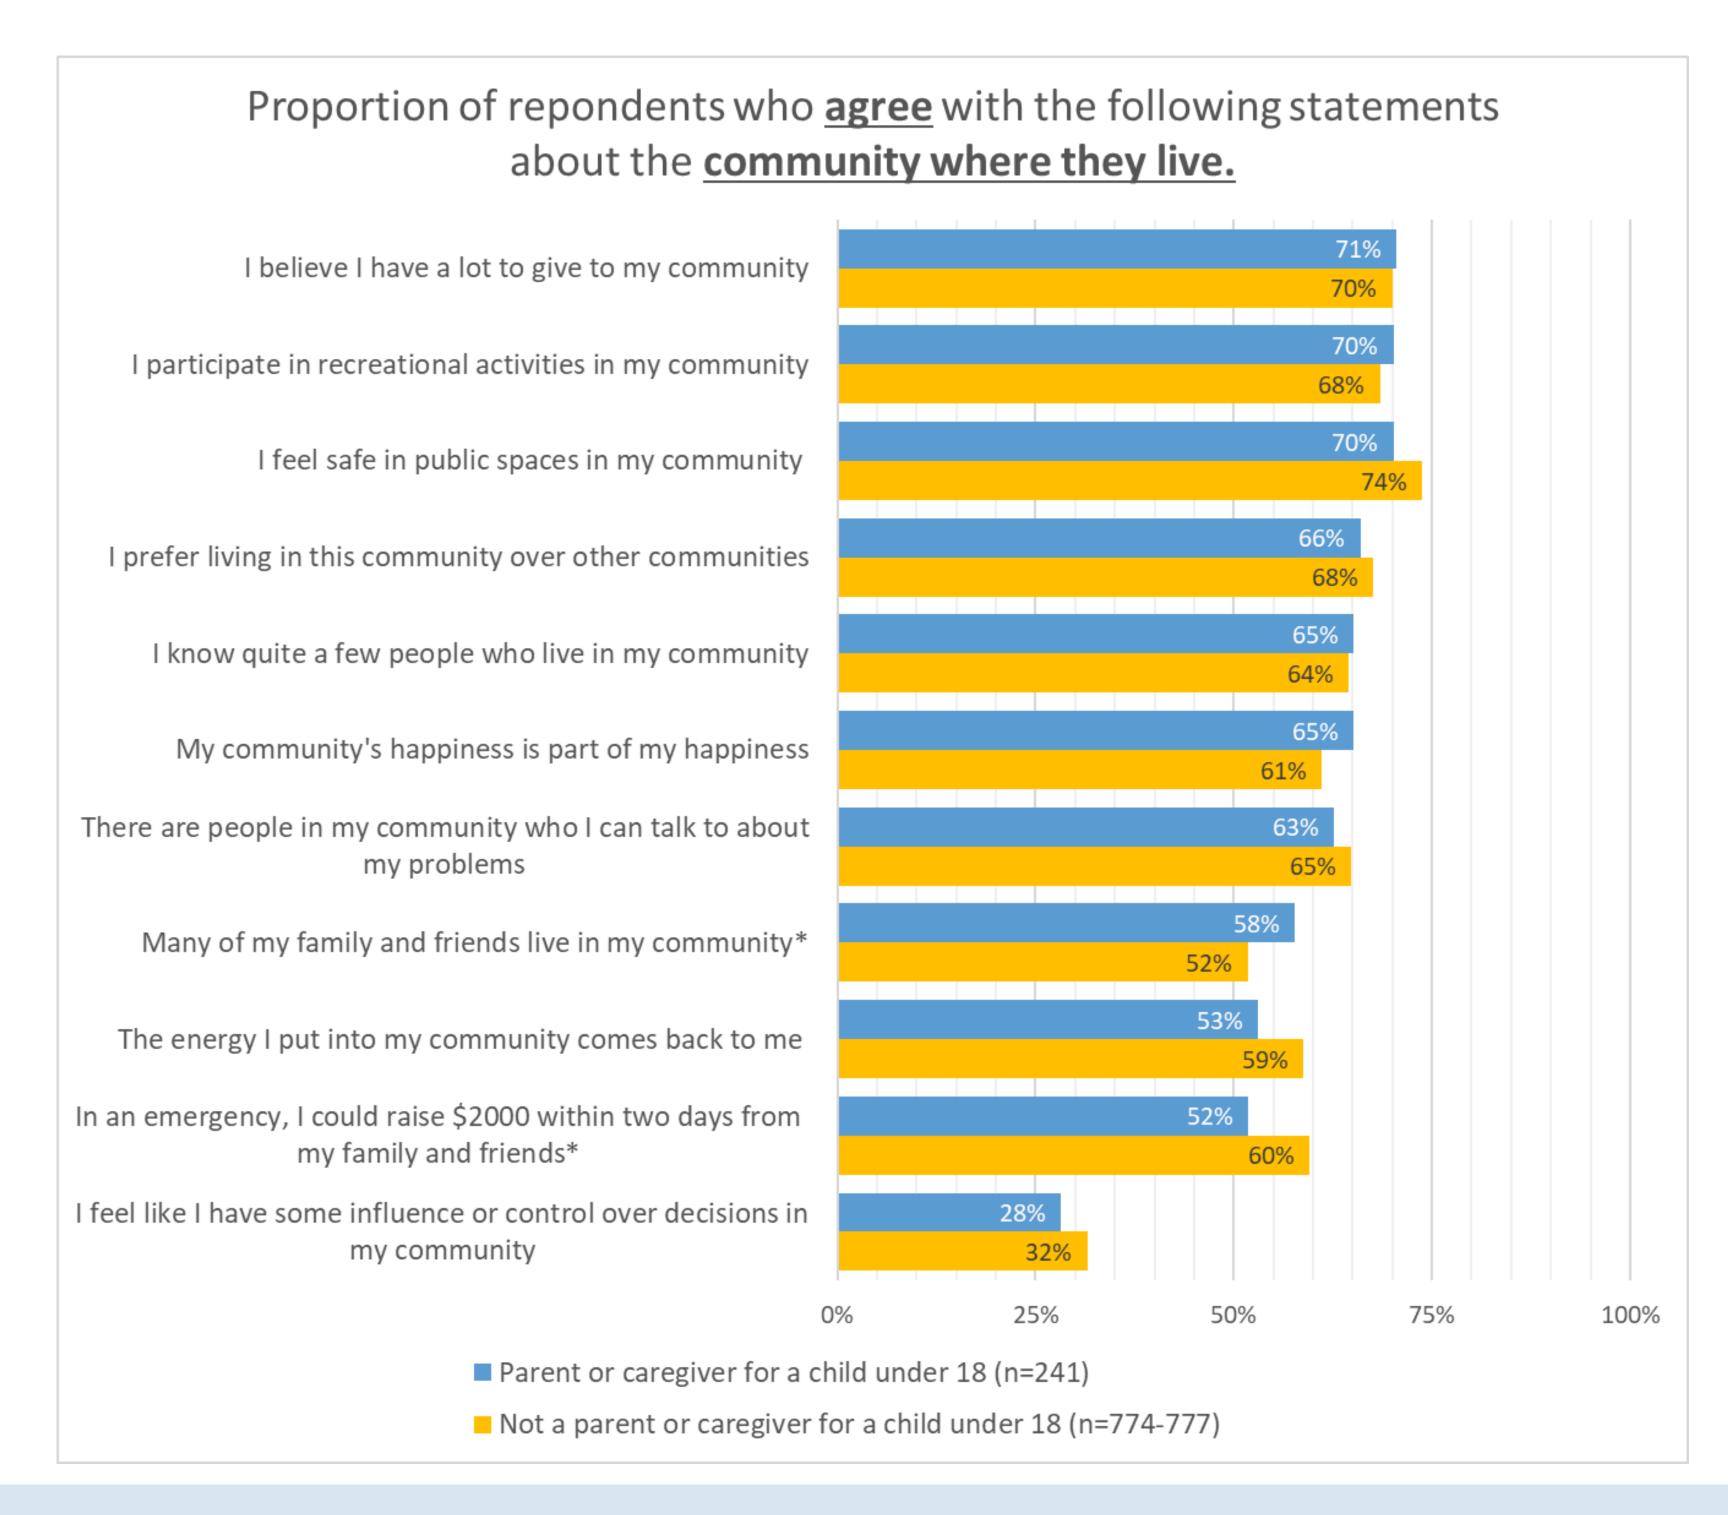

On a sticky note, share your thoughts by starting with "I notice..." or "I wonder...":

I notice	I wonder

Community Attachment & Connectedness in Central Oregon

Community Attachment & Connectedness among Parents & Caregivers

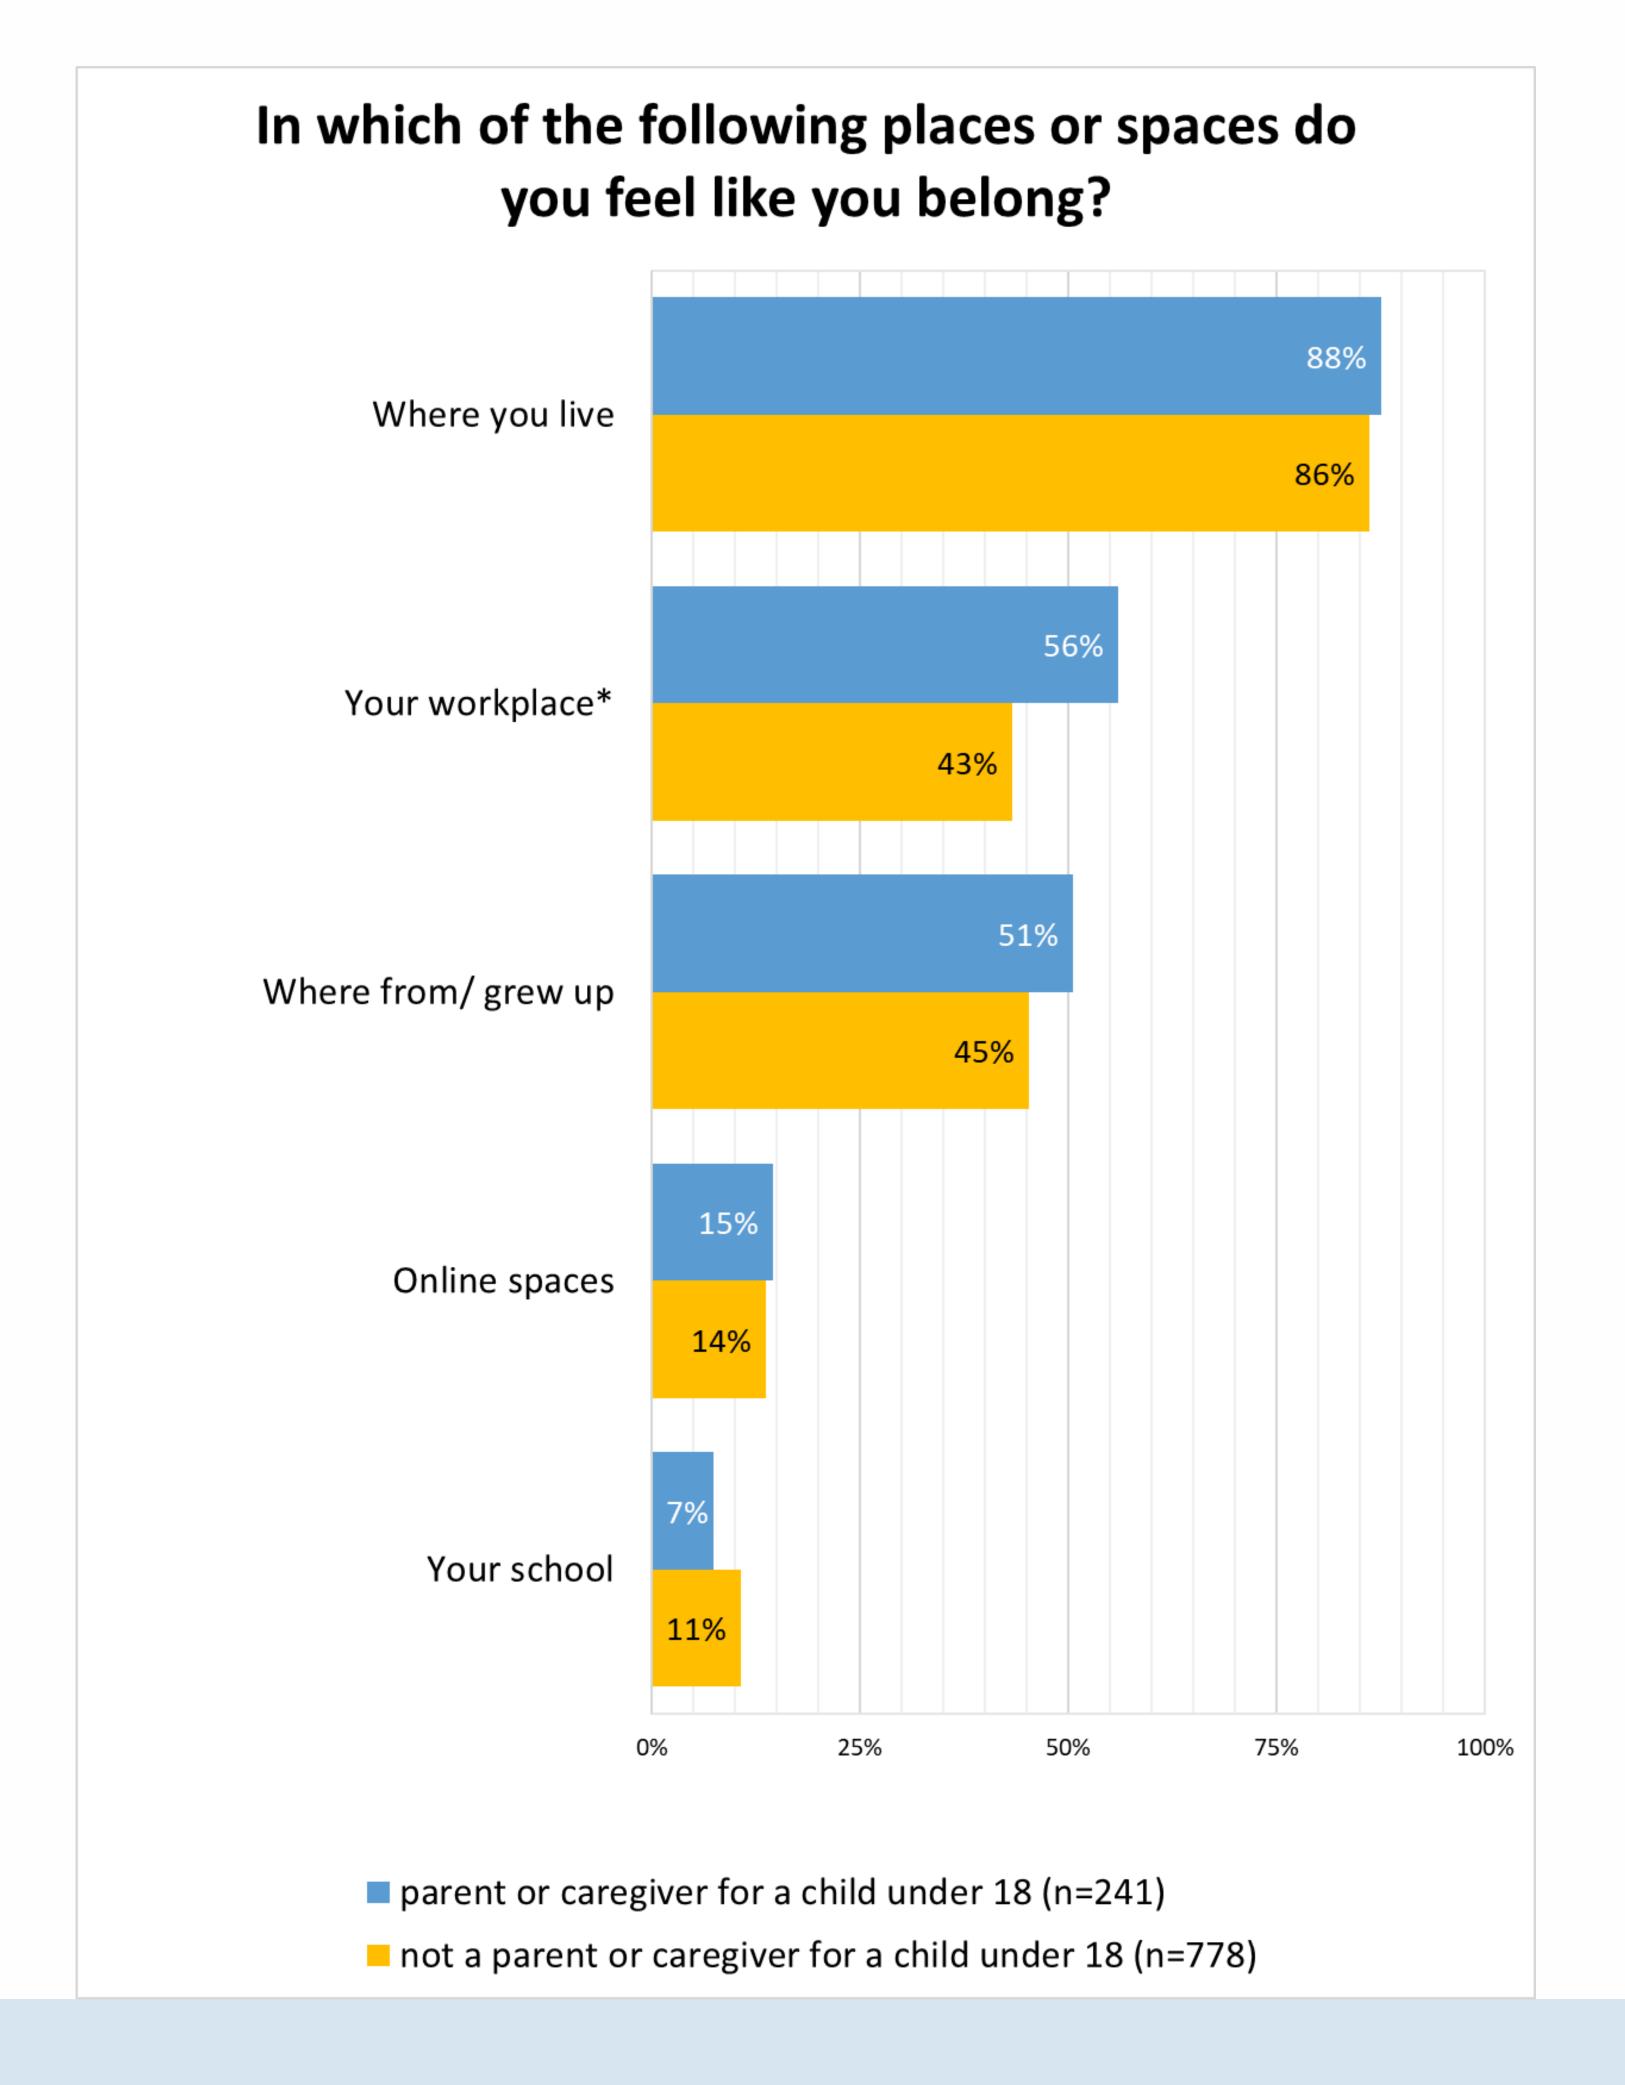

Notice the strengths:

"I have a lot to give my community" (71%)

"I feel safe in public spaces" (70%)

"I participate in recreational activities" (70%)

*There is a statistically significant difference between parents/caregivers and those who are not for items with an asterisk.

^{*}There is a statistically significant difference between parents/caregivers and those who are not for items with an asterisk.

What comes up for you? How is your experience similar? How is your experience different?

On a sticky note, share your thoughts by starting with "I notice..." or "I wonder...":

I notice	I wonder

We looked for themes from written responses to survey questions and answers to focus group questions to understand what helps and hurts the ability to feel you belong.

What words, feelings, or images, stand out to you?

"We're also thinking about moving because we can't afford to live here anymore. It's not so much the community of the people, but it's the cost of living in Central Oregon that's getting out of hand for us."

"For me, it's a sense of safety, of being in a place that is accepting of all types of people regardless of differences and knowing that I can be who I am and my children can be you they are without fear." "I wrote down [on my identity map]
'caretaker' as well, but I split it in private
caretaker for my family, for my child, and
then also professional beacuse I'm an
educator, so I'm a mom figure for a lot of
children."

"[Geographical distance] has been a barrier to the sense of belonging, because there's no family here except for my immediate family... [my husband] never really had a place that he called home, except for his family."

"I can only do what I can do through [a place] that doesn't cost me much, but it's just I don't feel valued as a person if I know, "Oh, I can't even do this little thing that I enjoy because I don't have enough money to do it."

Here's what we noticed too.

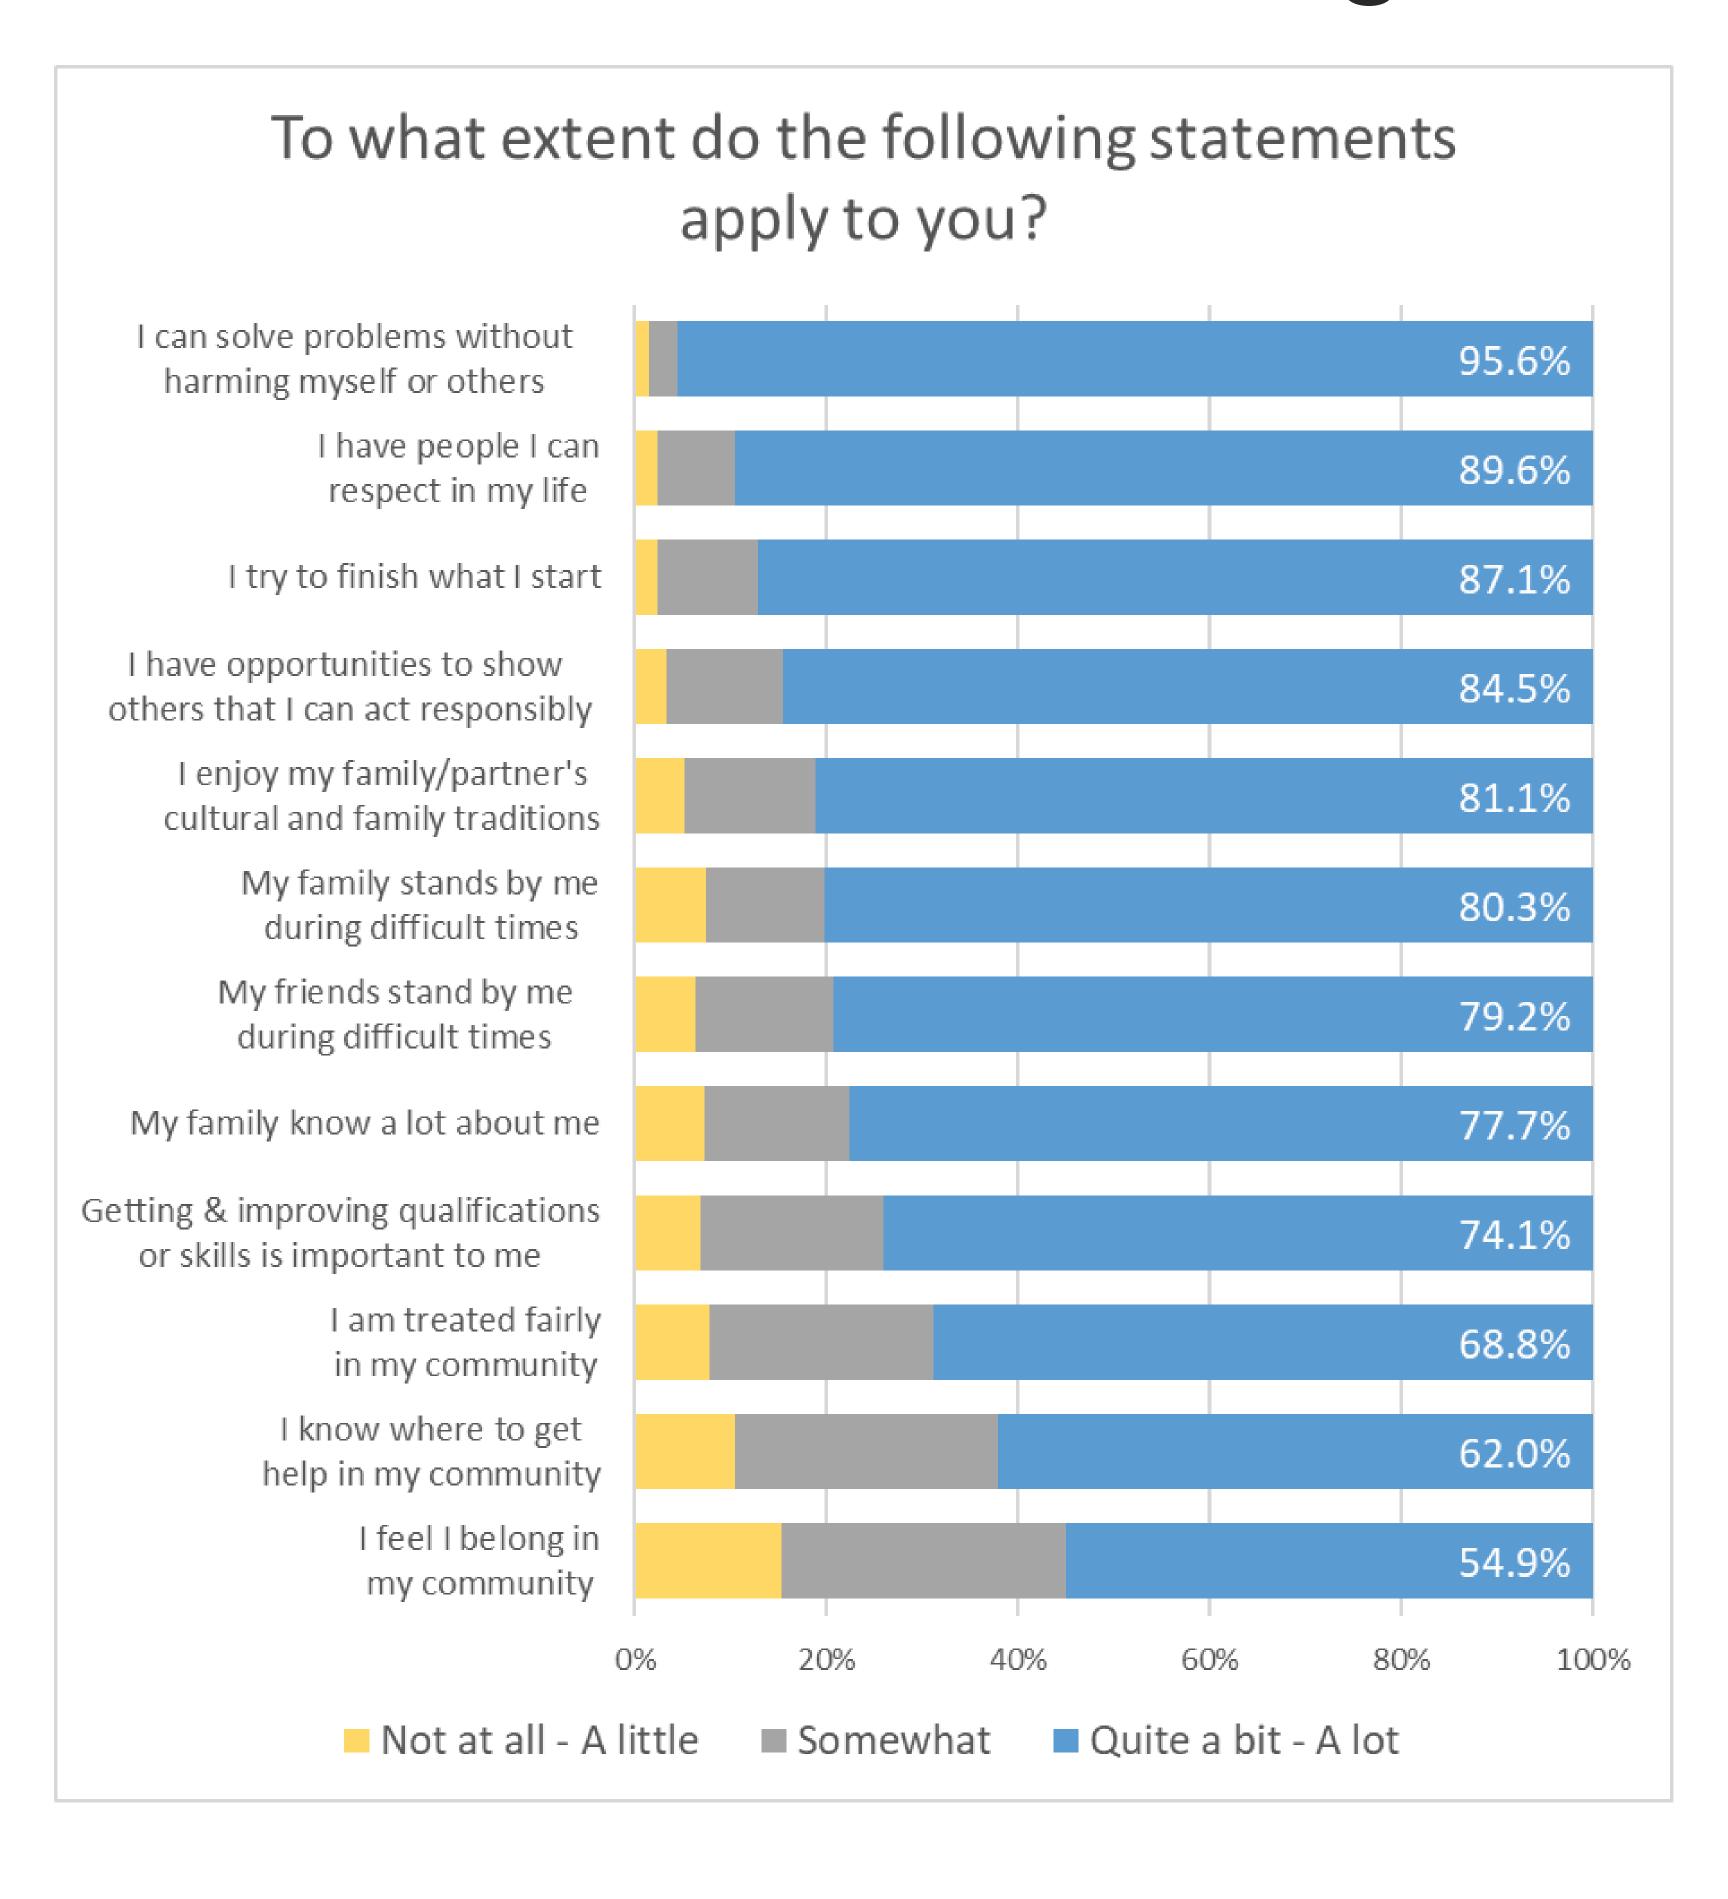

Caregiving is a big part of participants' identity. It gives parents purpose and is present in relationships in and outside of the family.

Family (and extended family)
can make a place feel like
home.

Having spaces that are physically and emotionally family-friendly provides a sense of safety for kids to be kids and acceptance of caregiving roles/responsibilities.

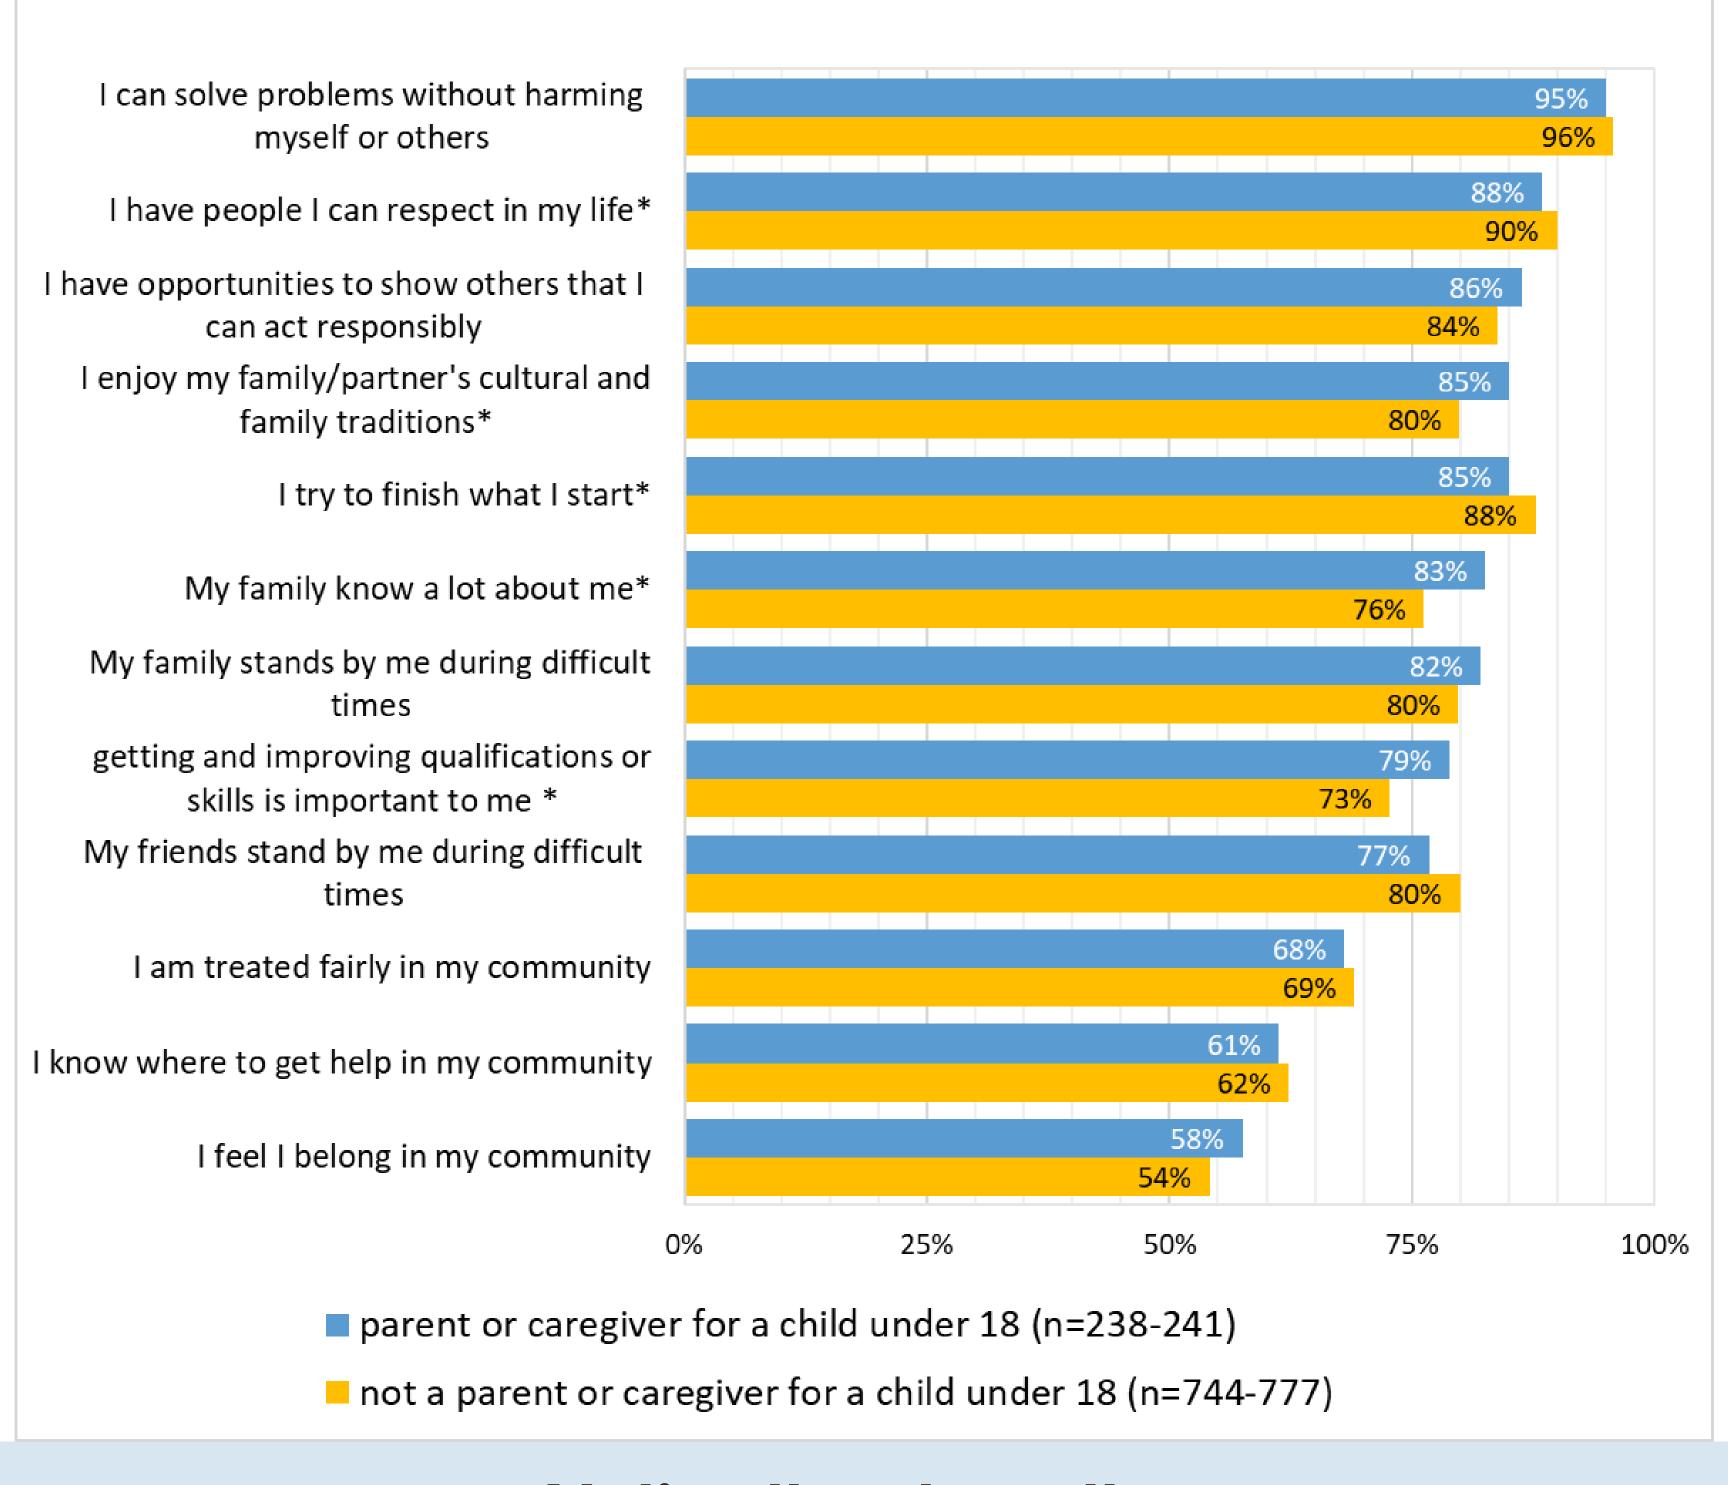

It can be hard to feel like you belong if you can't afford to live here or do the things you want to do.

Resilience in Central Oregon

Resilience among Parents & Caregivers

Proportion of respondents who indicate that the following statements apply to them "Quite a bit" or "A lot."

Notice the strengths:

"I can solve problems without harming myself or others" (95%)

"I have opportunities to show others that I can act responsibly" (86%)

"I have people I can respect in my life" (88%)

*There is a statistically significant difference between parents/caregivers and those who are not for items with an asterisk.

What comes up for you? How is your experience similar? How is your experience different?

On a sticky note, share your thoughts by starting with "I notice..." or "I wonder...":

I notice	I wonder

In what ways can challenges to belonging be addressed?

How can we support strengths that promote a sense of belonging?

These findings and recommendations will be shared with community groups working to support Central Oregonians.

We also asked for recommendations from survey and focus group participants.

Do you see these actions happening already?

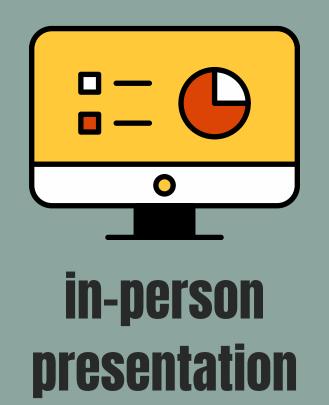

Are any of these new ideas?

Work in Progress	New Idea

How would you want to find out about the results of this study?
