

Creating A Health Equity Culture: Tools and Resources to Support Rural Healthcare Leaders

2024 Forum on Rural Population Health & Health Equity ***Oregon Office of Rural Health***

Alana Knudson, PhD
13 June 2024

Why should rural areas matter to you?

Rural areas are not only the source of much of our food, drinking water, energy production, and outdoor recreation, one in five Americans—including a disproportionate number of veterans and active-duty service members—live there, making the study of the health needs and challenges of rural Americans essential to us all.

NORC Walsh Center for Rural Health Analysis

Defining Health Equity

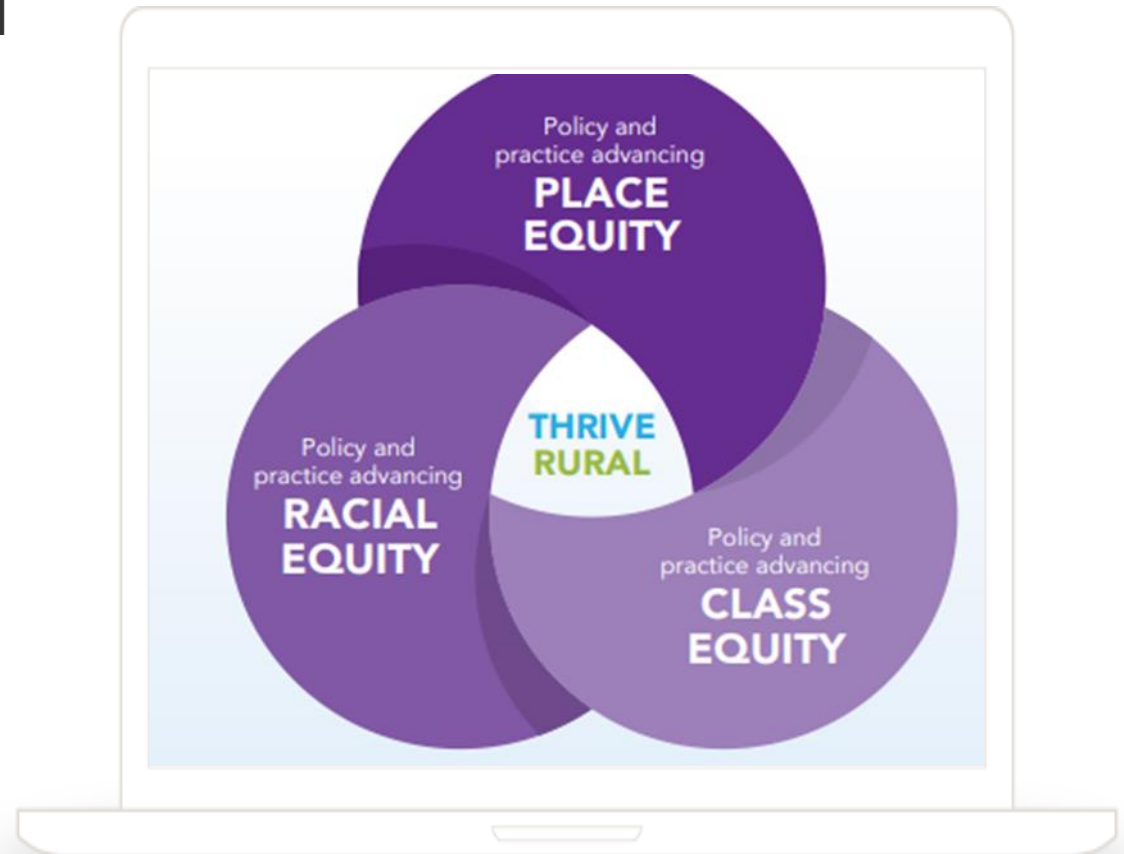

By health equity, we mean everyone
has the opportunity to attain their
highest level of health.

American Public Health Association

Multiple concepts involved in health equity

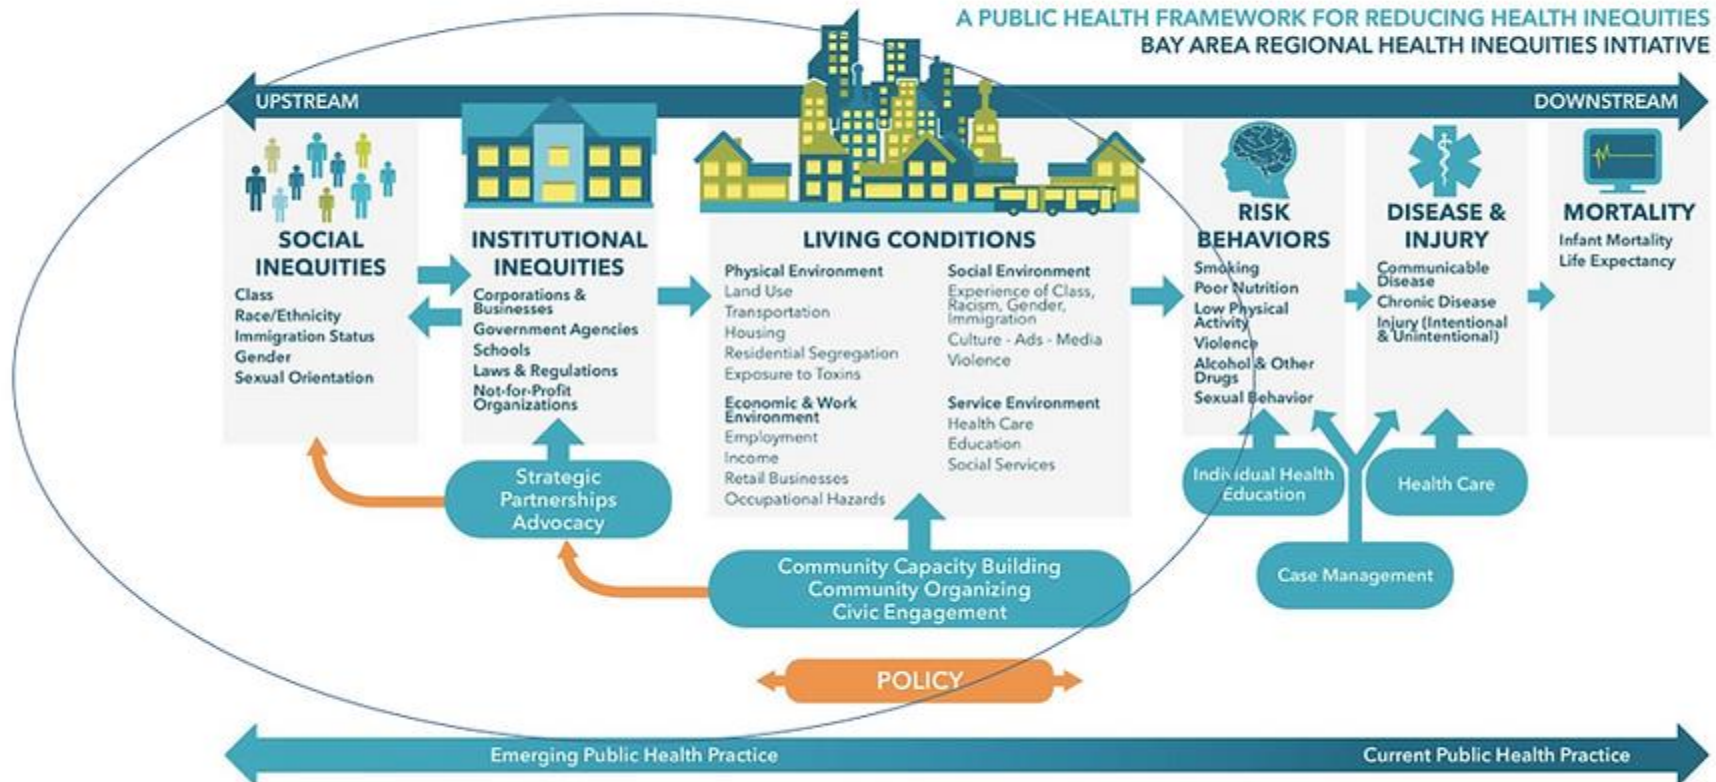

- Ability to achieve the best possible level of health or live one's healthiest life
- Absence of health and healthcare disparities
- Elimination of challenges that cause inequities, such as poverty and discrimination
- Access to opportunities that promote health, including healthcare and fair employment

The Root Causes of Inequities

U.S. employment in metro and nonmetro areas, 2007–22

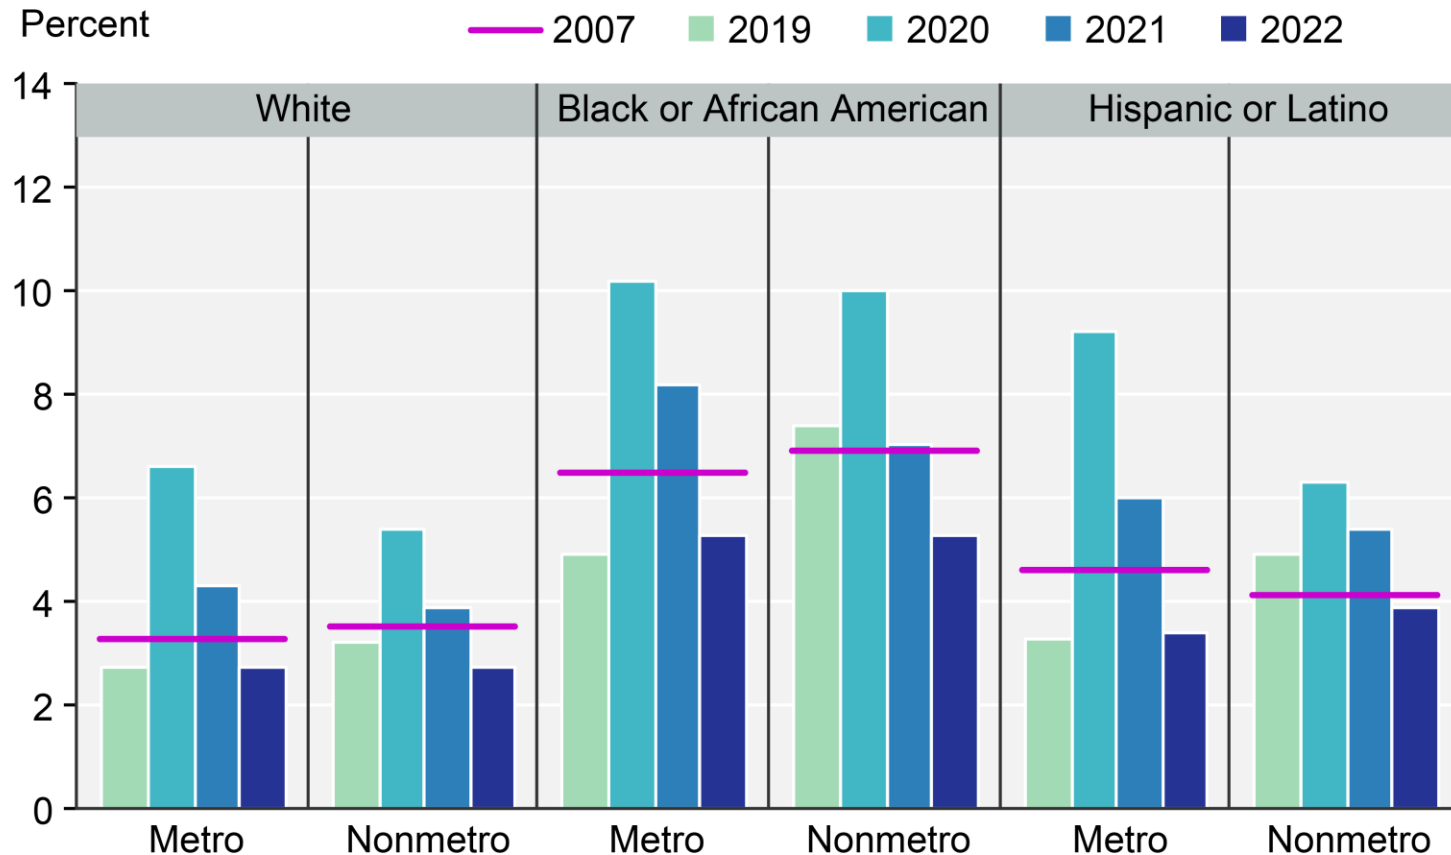

Percent of 2007 employment (2007=100)

Note: Employment is based on annual average total employment by county, summarized by metro and nonmetro status based on the 2013 definition of metropolitan counties, as determined by the U.S. Office of Management and Budget.

Source: USDA, Economic Research Service using data from the U.S. Department of Labor, Bureau of Labor Statistics, Local Area Unemployment Statistics program (April 21, 2023 release).

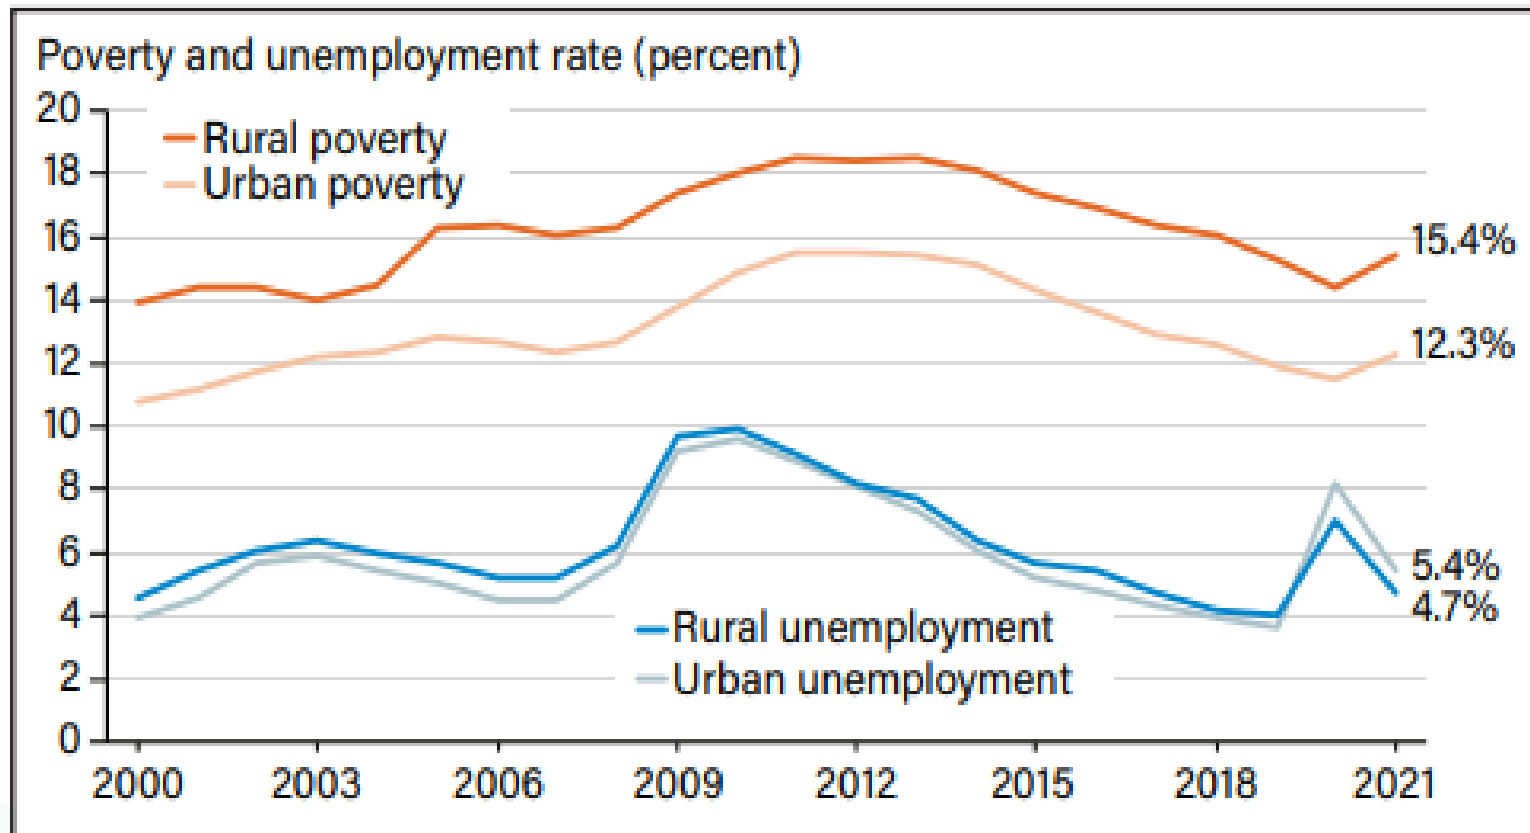

U.S. unemployment rates for the prime-working-age population (ages 25 to 54) in metro and nonmetro areas by race/ethnicity, 2007 and 2019–22

Note: Metro and nonmetro designations for 2007 are based on the 2003 definition of metropolitan counties; designations for 2019, 2020, 2021, and 2022 are based on the 2013 definition, as determined by the U.S. Office of Management and Budget.

Source: USDA, Economic Research Service using data from the U.S. Bureau of Labor Statistics, Current Population Survey.

U.S. rural and urban poverty and unemployment rates, 2000-21

Note: Rural/urban status is based on 2013 county nonmetro/metro delineations as determined by the Office of Management and Budget.

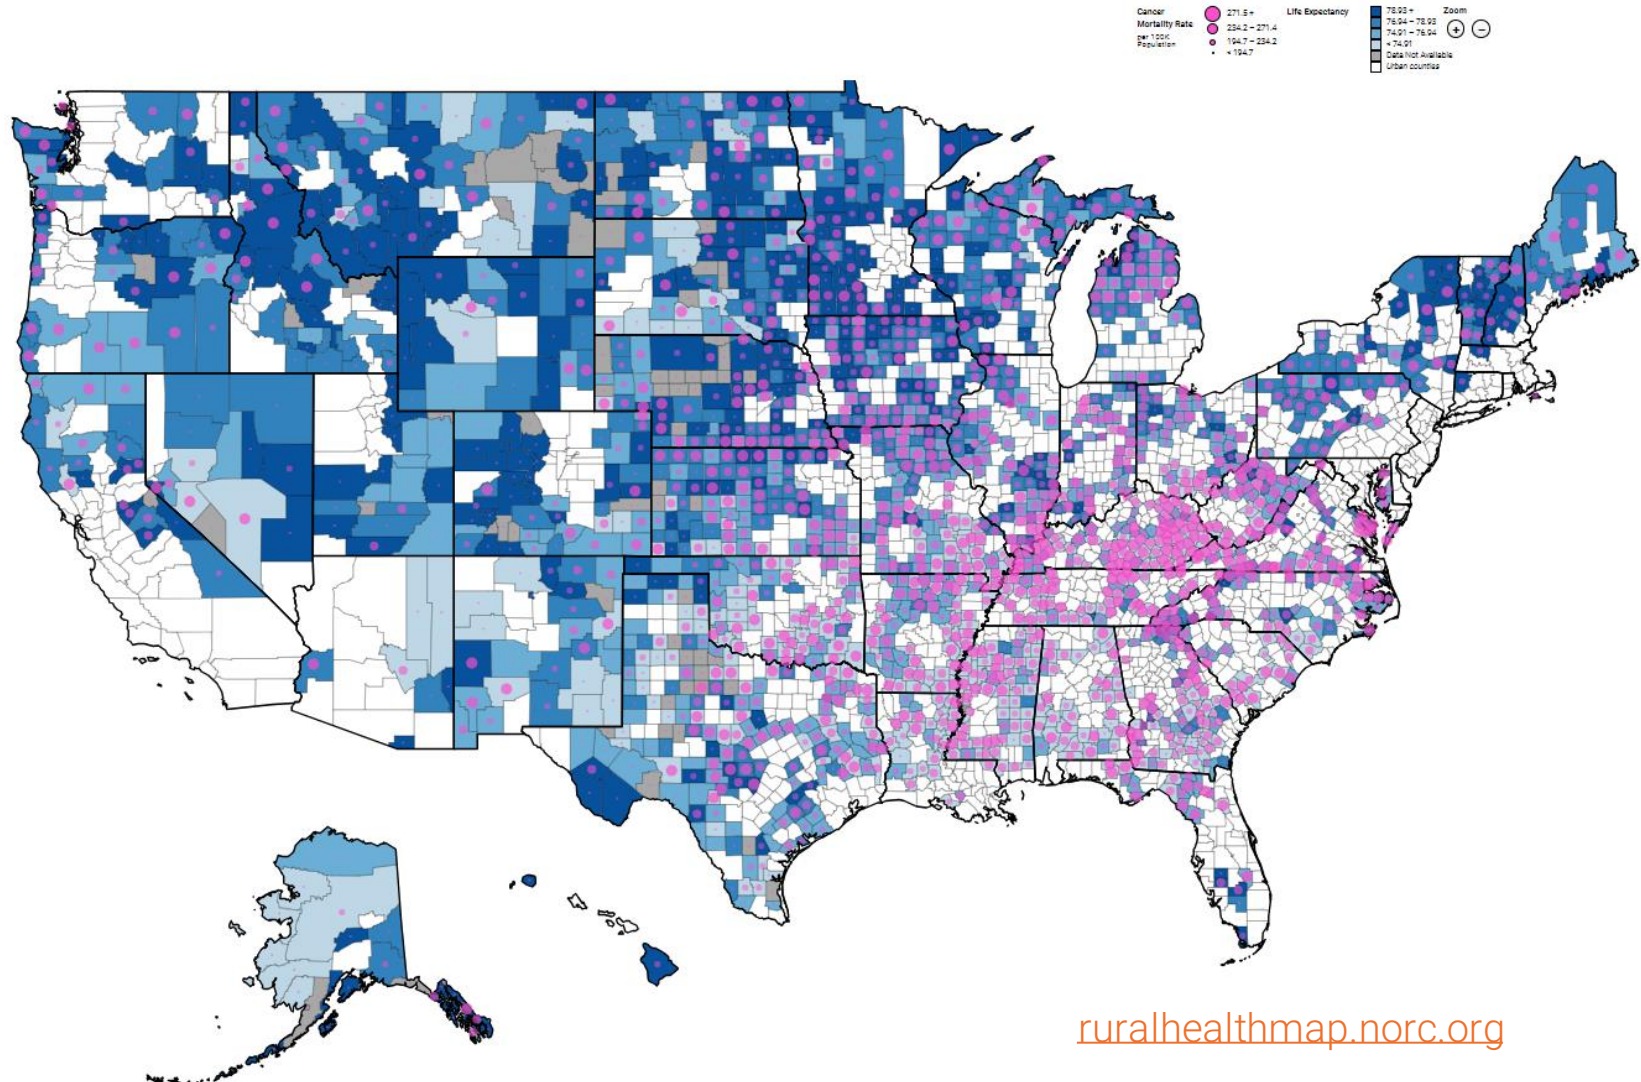

Source: USDA, Economic Research Service using data from U.S. Department of Commerce, Bureau of the Census (poverty) and U.S. Department of Labor, Bureau of Labor Statistics (unemployment).

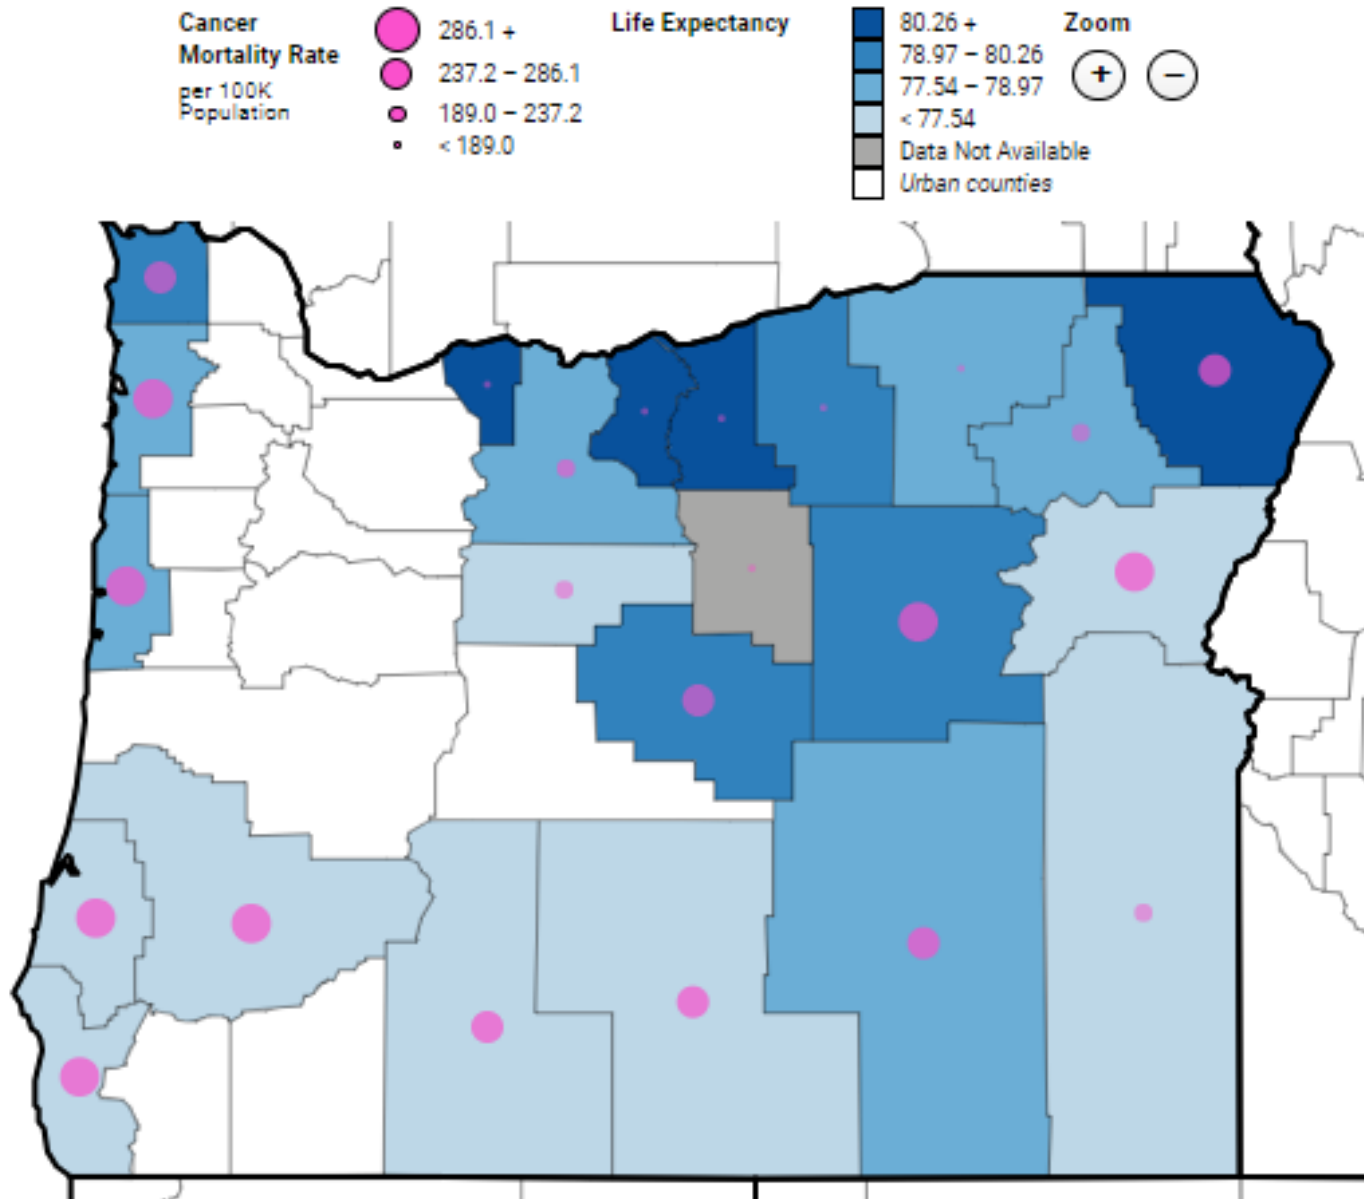

Age-adjusted prime working-age natural-cause mortality rates, metro and nonmetro areas, 1999–2019

Note: Natural-cause mortality rates are deaths from disease per 100,000 residents. Metro (metropolitan) and nonmetro (nonmetropolitan) counties are delineated by the Office of Management and Budget's 2013 Core-Based Statistical Area definition. Prime working-age is 25–54 years of age.

Source: USDA, Economic Research Service using data from the U.S. Department of Health and Human Services, Centers for Disease Control and Prevention, Wide-ranging Online Data for Epidemiologic Research (WONDER).

Life Expectancy and Cancer Mortality in Rural U.S.

Curry County, OR

Life Expectancy **77.0**

Population (Rural, Micropolitan) **22,650**

The mortality rate for counties with 10 to 19 deaths during the time period is considered unreliable and therefore not presented. The mortality rate for counties with fewer than 10 deaths during the time period is suppressed.

Click on a variable in the leftmost column of the data table to see its definition.

Leading Causes of Death Data Table

Leading Causes of Death	Curry County	Oregon	United States
Alzheimer's Disease	77.6	46.8	37.8
Cancer	408.7	196.0	182.8
Respiratory Disease	117.6	46.8	46.4
Diabetes	53.9	31.3	28.7
Heart Disease	415.2	172.5	205.6
Influenza and Pneumonia	25.9	9.7	15.5
Kidney Disease	31.3	9.5	15.9
Liver Disease	44.2	18.4	14.8
Stroke	90.6	51.6	47.2
Suicide	35.6	20.5	14.4
Unintentional Injuries	93.8	58.6	58.2

Framing Health Equity

Finding Common Ground

- Will the terms “equity” and “social drivers of health” resonate with your staff and community?
- What messages work in rural areas?
 - Solve problems together
 - Be resourceful
 - People are the strongest asset
 - Important to involve people in the community and give them a seat at the table

→ **A New Way to Talk about Social Determinants of Health**
<https://societyforhealthpsychology.org/wp-content/uploads/2016/08/rwjf63023.pdf>

→ **Talking About the Social Determinants of Health**
<https://www.naccho.org/uploads/card-images/public-health-infrastructure-and-systems/Talking-About-the-Social-Determinants-of-Health-FINAL.pdf>

Framing Messages

- Be mindful of where you attribute the problem and the solution
 - Avoid common rural refrain: “older, sicker, poorer”
- Focus on solutions is an effective approach to build support
- Create different messages based on readiness to have conversations about health equity

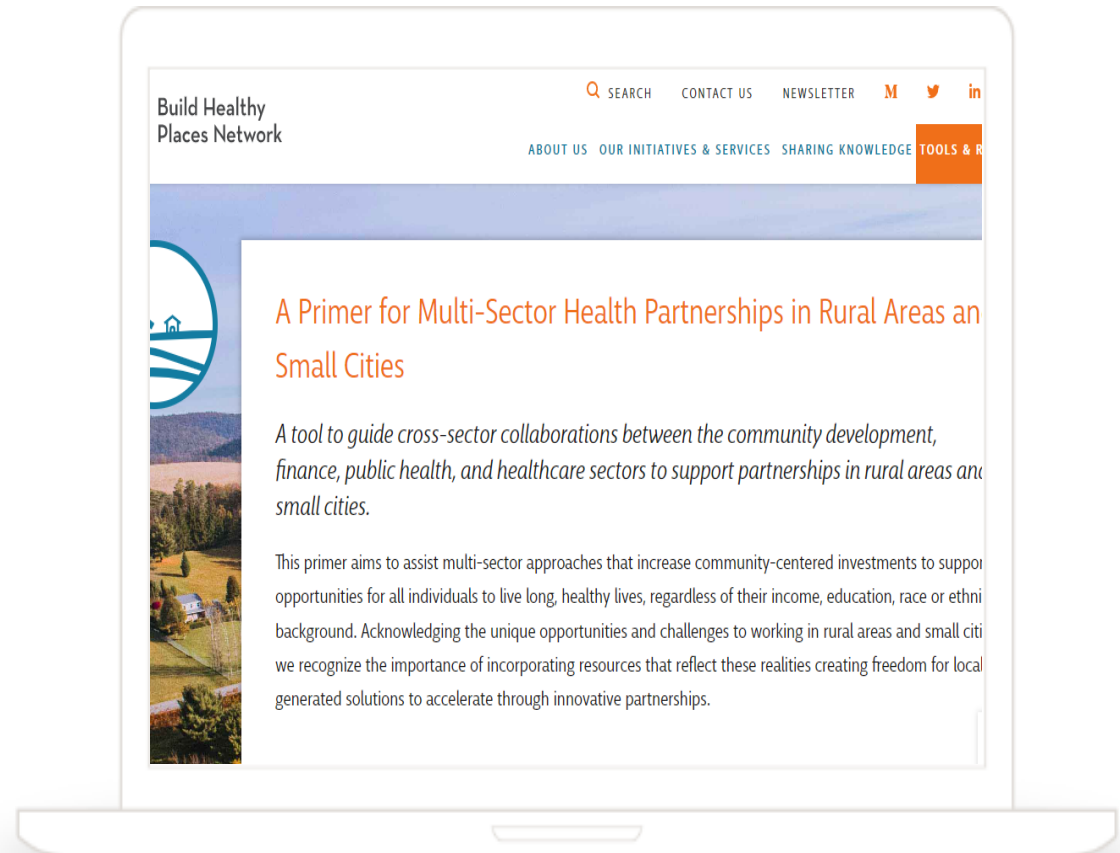

- **Framing Health Equity: Communication Strategies that Work**

- **Communicating in Conservative Contexts: Strategies for Raising Health Equity Issues Effectively**
<https://dialogue4health.org/web-forums/communicating-in-conservative-contexts-strategies-for-raising-health-equity-issues-effectively>

Fostering Multi-Sector Collaboration

Fostering multi-sector collaboration

- In addition to building new collaborations, could involve promoting equitable practices in existing partnerships
- There may already be rural groups and coalitions that are organizing around similar issues, but may not have a seat at the table with decision makers and funders

→ **A Primer for Multi-Sector Health Partnerships in Rural Areas and Small Cities**

<https://buildhealthyplaces.org/tools-resources/rural-primer/>

Building Organizational Capacity

Building organizational capacity

- Train staff on different aspects of health equity
- Develop permanent infrastructure for equity, e.g., through policies and formal partnerships
- Build and retain a representative workforce
- Leverage position as anchor institute

Southeast Arizona Area Health Education Center

- **Project Title:** [Healthy Farms Program](#)
- **Program Representative Interviewed:** Gail Emrick
- **Location:** Cochise County, AZ
- **Program Overview:** SEAHEC's Healthy Farms Program began as a farmworker health initiative in the Winchester Heights community or "colonia" of rural Cochise County, Arizona. Most residents of Winchester Heights are Latino farmworkers who face numerous structural barriers in accessing health care and improving the conditions in which they work and live. SEAHEC began the Healthy Farms Program when a community needs assessment revealed the substantial health inequities in Winchester Heights. The Healthy Farms Program first trained community members to serve as

Building Community Capacity

Develop Rural Leaders

- One key approach to building capacity is developing rural leaders – especially increasing representation of communities that experience inequities

Strengthening Leadership to Transform Rural Communities

Leaders are the head and heart of vibrant, strong rural communities. Leadership, in fact, may be the difference in why some communities thrive while others struggle.

RuraLead is a learning initiative. We want to understand impactful leadership qualities and leadership development practices.

→ **RuraLead**
<https://ruralead.org/three-imperatives-for-a-better-rural-future/>

Key Opportunities in Rural Health Equity

Operationalizing health equity

- Moving from data collection to action
- Implementing innovative programs (challenge: length of time for demonstrating outcomes)

CHAPTER 9 Act on Your Data

PRAPARE is not simply about collecting data on patients' social drivers of health. It is also about responding to the socioeconomic needs identified. While "painting a fuller picture" of the patient can be therapeutic in many ways for both staff and patients, it is important to provide services to meet the needs when possible to assure patients that providing this information leads to action by providing better care. Even if organizations do not have all of the necessary services to respond to the socioeconomic needs, it is still important to gather this information to inform

→ **PRAPARE Implementation and Action Toolkit**
https://prapare.org/wp-content/uploads/2022/09/Full-Toolkit_June-2022_Final.pdf

Incorporate health equity in rural health care organizations

- Leverage value-based payment models
- Collect data to drive action
- Engage communities that experience inequities

Stepping Up: Health Equity in Rural Hospitals Podcast Series

This podcast series brings together a variety of voices to elaborate on the steps rural hospitals can take to implement sustainable health equity programs and efforts.

Series Audience:

Critical access hospital leadership/decision-makers, state Flex coordinators, future coordinators, Health Equity professionals

Series Description:

This four-part podcast series brings together a variety of voices to elaborate on the steps rural hospitals can take to implement sustainable health equity programs and efforts.

→ **The Health Equity Roadmap**
<https://equity.aha.org/>

Address infrastructure and capacity concerns

- Attract and retain a health workforce, including staff who reflect the communities that experience inequities
- Overcome persistent infrastructure barriers: transportation and internet access
- Advance economic and community development

Examples of State, Local, Public-Private, and Private Nonprofit Initiatives

While new strategies are constantly emerging, below are examples of actions promoting health equity in rural America that deserve consideration for replication on a wider and/or more permanent basis.

- **Providing access to clean water in Alaska:** Working in partnership, the Alaska Native Tribal Health Consortium, National Tribal Water Center and the Centers for Disease Control and Prevention (CDC), along with others, demonstrated the efficacy of providing in-home piped clean water (replacing the need to haul water, sometimes from considerable distances) in producing significant reductions in infection rates.¹⁴⁹

Rural Health Equity Toolkit

Welcome to the Rural Health Equity Toolkit. The toolkit compiles evidence-based frameworks and promising strategies and resources to support organizations working toward health equity in rural communities across the United States.

The modules in the toolkit contain information and resources focused on developing, implementing, evaluating, and sustaining rural programs that focus on health equity. There are more resources on general community health strategies available in the [Rural Community Health Toolkit](#).
